of Information Technologies in Education

Abstract

This in the article Uzbekistan in their school's electron diary and electron from journals use efficiency is studied. Electronic diary and of the magazine education to quality influence, parents and teachers between communication in improvement instead of, as well as time and resources in savings advantages analysis will be done. Also, these systems current in reaching surface coming problems, including internet infrastructure, technical services and of teacher's qualification with depends issues seeing will be released. Summary by doing in other words, electronic diary and journal systems study process modernization in doing important tool the fact that is emphasized.

Keywords: Electronic daily, electronic magazine, Uzbekistan schools, education efficiency, digital education system, teacher-parent communication, education process, technologies in education, education quality, internet infrastructure.

Introduction

Information and communication of technologies development education in the system new approaches and tools apply opportunity created It is also modern in Uzbekistan technologies education processes app to do through study process to improve directed one row reforms done is increasing. Electronic diary and electron journal such as digital systems this in the direction important place holds This in the article electron diary and magazines of application efficiency, education to quality effect, as well as their in-practice place is studied.

Electronic diary and electron journal what?

Electronic diary and electron magazine is of student's diary education the results control to do and teacher and parents between efficient contact installation for intended digital are platforms. Electronic diary of the student home duties, lesson table, grades and another information storage for service does Electronic journal while in class each one of the student common activity, mastery level and another study processes about information giver is a platform.

Electronic diary and magazines current of reaching advantages:

Parents and teachers between communication efficiency:

Electronic diary and journal to parents of their children education process observation enable gives Traditional diaries most of the time on paper is stored and they are student by wrong to be filled can Electronic in systems while data is real time mode entered and updated .

Education of quality increase :

Students grades , activities and in class attendance about data easy observation education quality improves . Teachers individual needs of students faster identify them suitable the approach work outputs can

Time and resources savings :

Paper diary and magazines conduct very a lot time and funds required is enough Electronic systems while to teachers the time to save help gives and documents automatic way storage enable gives

Digital security :

Electronic in systems all data safe way is stored and to them unauthorized enter took is taken . Paper magazines and in diaries while data loss or violation probability more will be

Practical problems and disadvantages :

Although electron diary and journal systems many advantages have although - them current in reaching some there are also problems stands for :

Internet and to technology depends problems :

Village in places low quality of internet in schools because of electron systems complete apply difficult to be can And all students and parents from the internet regularly use opportunity have not to be can

Teachers qualification:

New technologies apply for teachers special from preparation transfer demand will be done. Some teacher's electron magazines to conduct enough ready not to be can

Technician service show and software of supply to quality depends problems:

Electronic diary and magazines efficient to use for good quality software supply and stable technical service necessary Schools for intended some systems technical in terms of enough level not developed to be or to shortcomings have to be can

Summary

Uzbekistan in their schools electron diary and electron journal systems current to be done education process in improvement big important have They are of education quality increase , teacher-parent-student between connections strengthening and resources to save help gives That's it despite the internet infrastructure development and of teachers qualification increase such as practical issues are also neglected outside not stay need In general when , electron diary and journal systems study process more efficient and transparent to do for important tool is considered
