

MECHANISMS FOR IMPROVING YOUNG PEOPLE IN THE EDUCATION OF THE FAMILY, COMMUNITY AND EDUCATIONAL INSTITUTION

Abirova Umida Nazarovna

Teacher of the Department of Pedagogy named after Nizami

Researcher of the Republican Center for Spirituality and Enlightenment

Annotation

The article provides technology and recommendations for the social partnership in the family, community and educational institutions in the article in Uzbekistan. Basic concepts: youth, education, education, family, mahalla, social, social, spirituality, enlightenment.

Today, the current era is loading several demands and duties to family, neighborhood and educational institutions in educating the harmoniously developed generation. In our country, the country is primarily about the priority of the interests, protection of its rights, the priority of the interests of the interests of the interests and educational institutions. Therefore, educational institutions, community activists, live in the country directly and indirectly and indirectly and indirectly and indirectly. However, youth education in families, neighborhoods and educational institutions, remote areas and neighborhoods, ignorance of national values, early marriage, family divorces Such advocacy work aimed at preventing advocacy is most often in most cases does not yield expected results are taking serious attention. "

Currently, President Shavkat Mirziyoyev has committed one of the priorities, in particular, 22,000 young people in the 10 months of 2017.

Although the implementation of the Resolution No. 371 of the Cabinet was put into practice, until today, the student attendance manifest is low in educational institutions. Students do not attend classes for no reason and regularly. The main reason was that the executive discipline of resolutions No. 371, 175 was not fairly organized. The teachers of professional colleges give the homes of the attached students, neighborhood citizens are not themselves, not themselves, but special to students. As a result, the students themselves seal and sign a notebook. This leads to negative impairments of executive discipline, low attitudes, in partnerships in family, neighborhood and educational institutions.

- The Parents' Meeting Plan is developed in educational institutions and has not been approved by the decision of the Pedagogical Council. The Parents does not organize on the basis of plan of meetings.

- Parents of thirty students in the group are coming to parents meetings at the semi-year semester. They are also parents of students who are also good and well-educated, pedigree. Low, upbringing of mastery is not agreeing to parents of familial, unhealthy family children.

- The issue of employment of graduates is also one of the activities of cooperation between the family, the neighborhood and educational institution. Today, students are not fully sufficient in employees in their specialties. The reason is that there is no vacancies in organizations in organizations in the graduates of professional colleges. As a result, graduates are forced to work in non-emergency work. In some cases, young people not provided are causing their departure to work abroad in search of work.

The study of 1573 families allowed the evaluation of the state of the fronts by parents that need to be taken under children. Statistical analysis in the regions has shown that parents consider the main task to monitor the teaching of adolescents (Table 1). At the same time, he that they are friends with who are friends with whom they spend their free time and showed that attention is not enough for the reader.

The fourth direction of work in the five important initiatives in our country is aimed at raising a reader culture in the youth. This requirement is in its place that loads several requirements and duties to family, neighborhood and educational institutions in educating a harmoniously developed generation. However, due to the lack of scientific pedagogical compliance with this direction, there have been certain shortcomings in this regard. In particular, the number of apartments with the family library is an average of 37%. The remaining 63% did not meet the lack of family libraries in the apartments or does not meet demand (Table 2).

Table 2. The condition of the existence of family libraries in homes.

There were shortcomings in cooperation with the opportunities and decrees and measures to improve the sector, decrees and measures to improve the sector, and despite the activities of the family, neighborhood and educational institutions in various circulations. Studies are involved in students clubs and additional lessons, showing low social pedagogical efficiency of 44% to rationalize their free time (Table 3).

In terms of our research, Doctor of Pedagogical Sciences, Professor M. Kuronov is of special importance, developed by Professor M. Kuronov, and the three-component measurement system developed by Professor M. Kuronov, the measurements of measuring its degrees, levels, and qualities. The approach to the culture of the culture, national prathow, interethnic dialogue of the Uzbek patriotism, conscience, national etiquette, and the qualities that directly and indirectly connect to the national emotion of the developing person.

The gender characteristics of spiritual education is also reflected in Islamic enlightenment. The chairman of the Muslim Board of Uzbekistan, Mufti Usmankho Alimov writes this. "Women should dress hard and hold themselves well. This indicates that when Uzbek girls are dressed on the basis of national education, and spiritual moral qualities, they do not remain at the torment of "mass cultural attacks" entering the west.

In order to extend the socio-financing of public partnerships in educating the socially generation of public organizations in Uzbekistan, local representatives of the population, local representatives identify the existing problems in families, identify the existing problems in families, It is necessary to develop a program of measures to address. In this regard, it is necessary to develop a series of scientific and methodological recommendations aimed at improving the child's responsibility, strengthening family values, strengthening family values, maintaining peace and stability in the society!
