Abstract

In this article, views aimed at improving the quality and efficiency of services in the service sector are considered, and the problems of the development of services in rural areas today are detailed. In addition, there are suggestions and recommendations for raising the standard of living of the population.

Keywords: population, service, service delivery, agriculture.

We all know that in modern times, the role of services in the economy of the world's most powerful countries has a high profile. The development of this sphere remains the main goal facing all states. (Matthew 24:14; 28:19, 20) Jehovah's Witnesses would be pleased to discuss these answers with you. (Matthew 24:14; 28:19, 20) In conjunction with the growing population in our country, the growing number of new types of services is one of the requirements of modern times. All of this is due to our view of the needs of the population as a factor in maximizing the quality of life of the people of our country. It shows that the services sector develops and develops a variety of solutions for determining and managing the quality and quality of life of the population prohibits implementation. Additionally, the December 3, 2021, issue of our country's leader stated: "The priority of government policy on the development of entrepreneurship in the neighborhood, the maintenance of the population, and the reduction of poverty [1] It is impossible to say that the Decree on the Elimination of All Forms of Discrimination against Women will also contribute to our taking this issue more seriously.

Analysis of used literature. The service sector plays a vital role in improving the living conditions of the people of each country. (Matthew 24:14; 28:19, 20) Jehovah's Witnesses would be pleased to answers with you. When it comes to service, we first need to understand a person's labor product. The main marking of this product is the understanding of meeting the specific demands of individuals. In other words, the service is a type of activity aimed at meeting people's needs and needs. American economist K. R. McConnell described the service as follows: "The service is an inconceivable (invisible) and instead a consumer of something of value, is provided by a company or government." [2] It shows that services are considered

a comprehensive process, and the way the population lives cannot be imagined without them. For example, if we take the banking services center of a single commercial bank, even the population in remote areas has come to the regional centers of providing banking services to the population the ability of the main bank to provide almost all banking services to the population, along with helping to solve time and road-related problems in their departure and it's more effective with it. One of our country's economists, Professor J.Qurbonov, describes the services as follows: "The service is to bring goodness, goodness, and benefit to a person [3] When you study and analyze the scientific research of these economists, the main objective of the services sector is to improve the quality of life of these people and to ease people's burden to do it and to improve the quality of life.

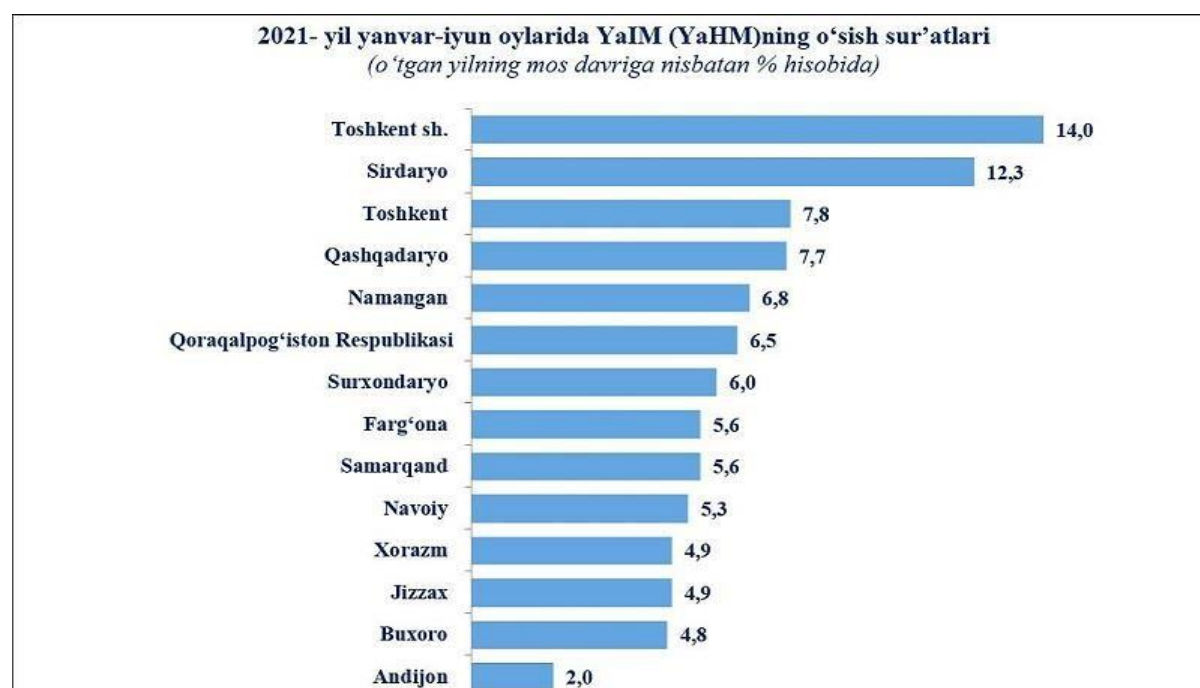

In order to improve the service sector and to improve the services sector based on time requirements, the President of the Republic of Uzbekistan stated: "Service in the Republic of Uzbekistan in 2017-2018 " Additional measures for the smooth development of the service and service sector in rural areas during 2017-2019 " Decisions were made. As a result of programs and measures taken to improve the service sector and services , the industry's share of JIM has grown significantly. This figure was 50.5% in 2020 , compared with 43.1% between January and June 2021. Today , those who are engaged in the industry make up more than 50% of the total busy population. Today , 80,4,000 or 81% of small business entities operate in the same service sector. More than 2,000 enterprises operating in the country are enjoying the privileges granted under the program. The implementation of the programs increased the total volume of services by 1.7 times and services per capita by 1.6 times. The main high pictures of development in the field are finance, construction, health care, communications and information technology, computer programming, and technology in agricultural machinery is observed in maintenance and repair and maintenance services. It should be noted that one of the main factors affecting industry growth is the convenience, opportunities, affordable investment climate created in small businesses and loans allocated by commercial banks. Implementation of all measures set out in the state program "The Year of Rural Development and Prosperity" , approved by the President of the Republic of Uzbekistan on January 26, 2019 increased incomes and rising living standards, social in rural areas further development of infrastructure, the establishment of modern infrastructure facilities, the construction of new jobs, the service and service sector, the education system, the medical care of the population paves the way for further development of culture.

Further development of infrastructure, improving transportation communications for rural areas, providing clean drinking water, providing medical services, educational services, especially Remote rural areas are being surrounded by telecommunications networks and postal communications. Resolutions adopted on the development of services and services in rural areas (NoPQ-1041 of January 20, 2019, NoPQ-1046 of January 26, NoPQ-1050 on January 28, NoPQ-1050 on March 17, 2019) To assist individuals desiring to benefit the worldwide work of Jehovah's Witnesses through some form of charitable giving, a brochure entitled Charitable Planning to Benefit Kingdom Service Worldwide has been prepared. changes have been made to the regional program for the development of the service sector, additional tasks have been adopted for the development of services in rural areas, convenient for entrepreneurs in rural areas measures were developed to create conditions, reduce gaps between the city and the village. The formation of infrastructure in rural areas provides modern and high-quality services to villagers, and by the end of this year alone, 140 is designed to establish more than 1,000 jobs. The implementation of the additional measures set out in the program is 118.9% of the total volume of services set out in resolution PQ-640 of the President of the Republic of Uzbekistan for 2020 instead allows you to grow by 123.4%. Strengthening monitoring aims to increase the share of services provided to villagers in this area from 26.8% to 30%. As a result of the work being done, in January-April of this year, the program's forecast of 116.2% for four months was 116.3%, while the services provided in rural areas represented 23.5% of the total volume of the republic organized by Jehovah's Witnesses. In rural regions of the Republic, much attention is attached to the development of infrastructure. During the past year, a forecast of 752 service facilities was established in rural areas, with 1,561 in practice. As a result of the increase in the quality of services provided in rural areas and the increase in types, the population's level of use of services is increasing. Services provided in retail and general catering systems are being developed in the country at a high rate. The total volume of goods increased by 17.7% in January-April 2021 compared to the same period the previous year, and 36% of the total volume of goods will be directed to rural areas. As a result of the year-on-year increase in stationary stores, the volume of retail sales achieved through them increased by 38.4%. As of May 1, this year, the number of inpatient stores serving in rural areas exceeds 20,000, 40% of which are food products and 32% are non-food goods and 28% of mixed goods are retail stores. The total amount of goods sold per capita in the villages from January to April amounted to 94,000 gallons [94,000 L].

In rural areas, communication and informing, financial and banking services are growing. As of May 1, this year, a total of 367 postal departments were established in the republic, including 87 rural areas providing postal services through information technology. The number of computer clubs is increasing. Electronic money transfer methods are evolving. Social during 2019-2020 under the state program "The Year of Rural Development and Prosperity", approved by the President of the Republic of Uzbekistan on January 26, 2019 Telephoned significant facilities, such as 3363 schools, 2388 preschools, 1249 rural medical punts, 93 colleges and 70 hospitals, will be telephoned. As a result of the work carried out on these tasks this year, the communications and information service will grow by 131.3% instead of the 130% set out in resolution PQ-640.

Statistics show that from January to June 2021, gross domestic product in the country amounted to \$318.5 trillion (U.S.) at current prices, the corresponding period last year we can see an increase of 6.2% compared to [4].

Gross domestic product growth was recorded and positive at 1.8% in the main sectors of the economy— rural, forestry, 8.5% in industry, 0.1% in construction, and 8.0% in services. with a growth picture .

The above data shows that the high growth rate in the region is Tashkent sh. 14.0%, Syrdarya 12.3%, Tashkent 7.8% and Kashgar 7.7% Registered in % regions [7].
