

TECHNOLOGY FOR ORGANIZING A DEVELOPMENTAL EDUCATIONAL SPACE IN SENIOR GROUPS OF PRE-SCHOOL EDUCATIONAL ORGANIZATION

Sh. M. Khasanova

Free Applicant Tashkent State Pedagogical University named after Nizami

Annotation

The child must have initiative and independence in various types of children's activities, the ability to choose occupations, partners, to generate and implement various plans, be confident in their abilities and open to the outside world. Therefore, the use of technology in organizing the developmental educational space of a preschooler is stimulating the child's communicative, playful, cognitive, physical and other types of activity, which contributes to his physical, psychological and intellectual development.

Keywords: Technology; space; organization; education.

INTRODUCTION

The main directions of state policy in the field of preschool education and upbringing in the Republic of Uzbekistan are: ensuring the realization of the right of every child to preschool education and upbringing; creation and development of alternative forms of education and upbringing; introduction of modern innovative and information and communication technologies for the comprehensive development of preschool children. [1, c.5] And the priority directions for the development of the preschool education system are: further improvement of the regulatory framework in the field of preschool education; creating conditions for the comprehensive intellectual, moral, aesthetic and physical development of preschool children. [2, c.4-5]

The technology for organizing a developing educational space in senior groups of a preschool educational organization, as mentioned above, is based on a list of regulatory documents: sanitary rules, norms and hygienic standards (SanRR) are aimed at protecting the health of children when carrying out activities for their upbringing, training, development and health, as well as care and supervision in preschool educational institutions. [3, c.3]

The requirements of the state standard of preschool education and upbringing of the Republic of Uzbekistan provide for technologies for organizing the developmental educational space of a preschool educational organization, as ensuring maximum implementation of developmental educational space and materials, equipment and inventory for the development of preschool children, as well as ensuring effective training and creating favorable conditions for children of primary and preschool age. [4, c.3]

The technology for organizing a developing educational space in senior groups of a preschool educational organization begins first at the threshold of a preschool educational

organization. Each visual, auditory and tactile object of a preschool educational organization must be an educational, developmental and educational space. The technology for organizing a developing educational space in senior groups of a preschool educational organization is one of the preschool education systems based on modern requirements, raising children healthy and fully developed, raising a spiritually harmonious generation. At the same time, special attention should be paid to the issues of developing in children a sense of love for the Motherland, respect for family, national, historical, cultural values of their people, and respect for the environment.
